

Top Sustainability Verification for DANZER UK

DANZER UK has been awarded verification from Alcumus SafeSupplier for demonstrating their ethical, environmental and financial credentials, to help clients assess compliance within their supply chain.

SafeSupplier offers a robust, streamlined, consistent and effective supplier on-boarding and management solution, that demonstrates supplier compliance to regulatory requirements, international standards and industry best practice in the supply chain.

The company's application for SafeSupplier verification was driven by the desire to demonstrate the highest standards in health and safety, quality, ethical best practices and responsible growth

Gemma Archibald, Director of Alcumus SafeSupplier said: "Major organisations simply cannot afford to run the risk of employing suppliers who are not able to prove that they have sound health and safety, quality, ethical best practice and responsible growth policies in place."

Being part of a global hardwood specialist, Danzer UK draws on an extensive in-house manufacturing and procurement network worldwide; this gives access to a reliable supply of a large variety of the world's finest and responsibly sourced timber products. At the same time, a deep knowledge and thorough understanding of local customer needs and business practices lets Danzer UK offer products and services tailored exactly to local market needs. Specific programs are being run for individual customers. Products are available both from UK stock and direct from one of our manufacturing facilities.
